Re: **Addendum C** to Letter of Opposition to “Last Crocker” Timber Sale:  
Representative Photographs

This addendum provides representative photographs of the “Last Crocker” timber sale that support our conclusion that the forest is structurally complex. Multiple canopies of both small and large trees of various sizes, gaps in the forest canopy, and forest floor plants are evident in most photographs.

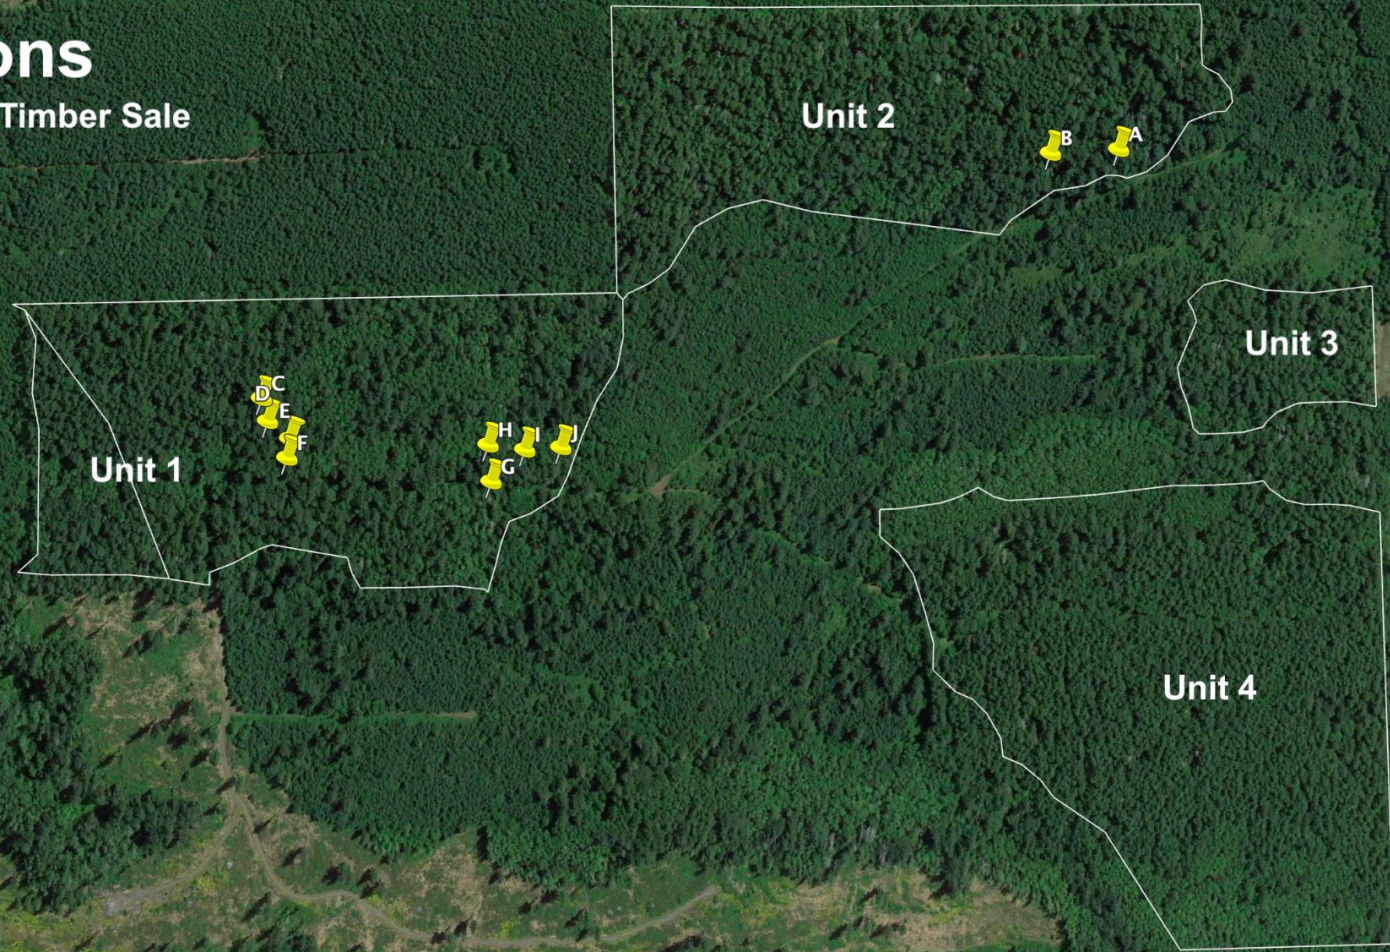

Please add this information to the record for the “Last Crocker” timber sale.

Thank you,

Stephen Kropp  
Director
